## SUGARCANE

**AJAY BIO-TECH (INDIA) LTD.**

पर्यावरण रक्षा, जीवन की रक्षा

# SUGARCANE

## **SET TREATMENT:**

For healthy sugarcane growth and to control of fungicidal diseases.

Mix Humi-Guard 2 ml + Tricho-Guard 2 ml / litre water. Put all set in that mixture for 20 minutes. Dry in the shade for 2-3 hours before sowing.

## **AT THE TIME OF SOWING:**

FYM/ Compost 500 Kg + Ajay Azo 2 lit + Sphurda 1 lit + Ajay Potash 1 lit + Humi-Guard 1 lit + for 1 Acre. Apply with irrigated water.

## **AFTER 45 DAYS OF FIRST DOSE:**

With chemical fertilizers apply Microcombi 3 Kg. + Humi-Guard 1 lit for 1 Acre. Apply with irrigation water.

# SUGARCANE

## **AFTER 80 DAYS OF SOWING:**

With recommended doses of chemical fertilizers mix Sphurda 1 lit + Ajay Azo 1 lit for 1 Acre. Apply with irrigation water.

## **AT VARIOUS INTERVALS viz. I) 2-3 MONTHS, II) 5-6 MONTHS, III) 8-9MONTHS, IV) 12-13 MONTHS OF SOWING.**

With recommended doses of chemical fertilizers apply Microcombi 1 lit for 1 Acre. Apply with irrigation water.

Spray Grorich Plus 1 ml/ litre of water. Repeat after 15- 20 days. This will increase the yield.

## **PLANT PROTECTION:**

- **Red Rot, Black Rot:**

Drench with 5 ml / lt of water Tricho-Guard and Pseudo-Guard alternately at 10 days interval

- **Termite, White Ants, White Grubs:**

Drench soil with 5 ml / lt of water with Meta-Guard at 10 days interval.
